

Assignment On DOM

DOM Manipulation Using Input, Button Click & Style Changes

Objective

The objective of this assignment is to learn **basic DOM manipulation** using JavaScript by:

- Taking input from a text box
 - Replacing paragraph content dynamically
 - Changing text color
 - Changing button text
 - Changing button background color
-

Technologies Used

- HTML
 - CSS
 - JavaScript (DOM)
-

Problem Statement

Create a web page that contains:

1. One **input box**
2. One **paragraph**
3. One **button**

DOM Assignment Using Input Box

Welcome to DOM Assignment

Update Text

On clicking the button:

- The text entered in the input box should replace the paragraph text
- Paragraph text color should change
- Button text should change
- Button background color should change

Rules

- Use **only DOM methods**
- Use **JavaScript only** for content and style changes
- Do not use any JavaScript frameworks

Expected Output

Before Click

- Paragraph text:
Welcome to DOM Assignment
- Button text:
Update Text

After Click

- Paragraph text:
Text entered by user

- Paragraph color:
Green
 - Button text:
Updated
 - Button background color:
Purple
-

Submission Guidelines

1. Create separate files:
 - `index.html`
 - `style.css`
 - `script.js`
 2. Ensure proper folder structure
 3. Submit the complete folder as instructed
-

DOM Assignment Using Input Box

Hiie...! My name is Yogesh
