

Assignment: Node.js HTTP Server (Console Output Only)

Assignment Title

Node.js HTTP Server with GET, POST, PUT, DELETE (Console Messages)

Technologies Used

- Node.js
 - Core `http` module
-

Problem Statement

Create a Node.js application that:

1. Creates an HTTP server using the `http` module
 2. Handles the following HTTP methods:
 - GET
 - POST
 - PUT
 - DELETE
 3. When a URL is accessed, display a meaningful **console message**
 4. Browser response can be simple text
-

Rules

- Do **not** use Express.js
 - Do **not** use JSON responses
 - Use `console.log()` for output
 - Server must run on **port 3000**
-

Expected Output

HTTP Method	URL	Console Output
GET	/	GET request received

HTTP Method	URL	Console Output
POST	/	POST request received
PUT	/	PUT request received
DELETE	/	DELETE request received
